Certifications & Identity numbers

SBA 8(a) Certified ♦ GSA Contract: **GS35F0714R** ♦ CAGE: **3D7Y2** ♦ DUNS: **093078835** ♦ GA DOT **certified MBE**

Company Overview

- Teledon Solutions is a certified 8(a) business performing in the Telecommunications, Systems Engineering, Information Technology, and Construction & Project Management arenas for government and commercial customers - with a certified, OSHA knowledgeable Safety Engineer on staff
- **An established** business under same ownership & management since January 1999
- **Smooth product & service delivery is achieved through our unique processes, our daily email progress reports, and our ability to anticipate & proactively address issues**

Core Competencies

- ✓ Full turnkey Engineer, Furnish & Install services
- ✓ Sales, design, implementation, and support of VoIP and traditional telephone systems
- ✓ RF services: Drive Testing/Commissioning & Installation
- ✓ Supply of custom optical cables and cable harnesses, including legacy items
- ✓ Voice/data center Iron work & infrastructure build
- ✓ Construction engineering & project management services through our professional engineers
- ✓ Custom mobile generator platforms
- ✓ Electrical contracting & low voltage systems
- ✓ Custom cabinet fabrication & machine shop services

Experiences

Government sector –

GEORGIA PERIMETER COLLEGE

Installation of data cabling throughout campus

FORT GORDON, GA

Installation and testing of complete data and voice communications system

OSHA REVIEW COMMISSION

IT support contract

MALMSTROM AFB

Designed optical transport system & provided remote support

KINGS BAY, USN

Design and implement state of the art IP-based PA system

Commercial sector –

TDS TELECOM

Installation & support of central office equipment

VERIZON WIRELESS

Construction/project management of office building expansion

AT&T

Network Engineering Services

LEVEL 3 COMMUNICATIONS

Design and fabricate custom data cabinets & provide integration services

NORTEL NETWORKS

Contracted to provide staffing support

List of Key Team Members' Experiences

- **Franklin Agyeman-Yeboah, PE, CPC** – 15-years experience in civil engineering, construction, project management, and construction administration
- **Joshua Dobos** – 14-years of experience in telecom, data systems, & low voltage systems
- **Gary Haynes** – 17-years of experience in Central Office EF&I work, specializing in power systems
- **James Kelley** – 25-years experience with databases, and in IT network design and support
- **Robert McDowell** – 24-years experience in IT and Telecom program & business management
- **April McDowell** – 22-years experience in industrial hygiene and safety engineering
- **Gene Morgan** – 26-years of experience in electrical and structured cabling, and digital switching
- **Jennie Pantano** – 25-years of experience in business management and accounting
- **Lewis Reid** – 17-years of experience in hardware design, and business financial management
- **Peter Sudar** – 16-years of experience in RF network engineering and installation

Our customers have cited our efficiency and our daily progress reports in the deployment & support of telecom networks as strong values we bring to the table.

Teledon Quality Auditor verifying that our work meets our customer's quality standards

Completed line up of frames, light guide trays, and AC lighting

Proper labeling, with optional "flag-tags"

Attention to detail, meticulous planning, and a thorough quality program assure a hassle free experience when working with Teledon Solutions –

[Satisfaction guaranteed.](#)

Reducing our customers' administrative burdens by making sure we understand the work requirement, resulting in minimal or no change orders.

Converting a fixed diesel generator into a mobile platform

Verizon Wireless needed a mobile solution for emergency power generation. This picture shows the generator.

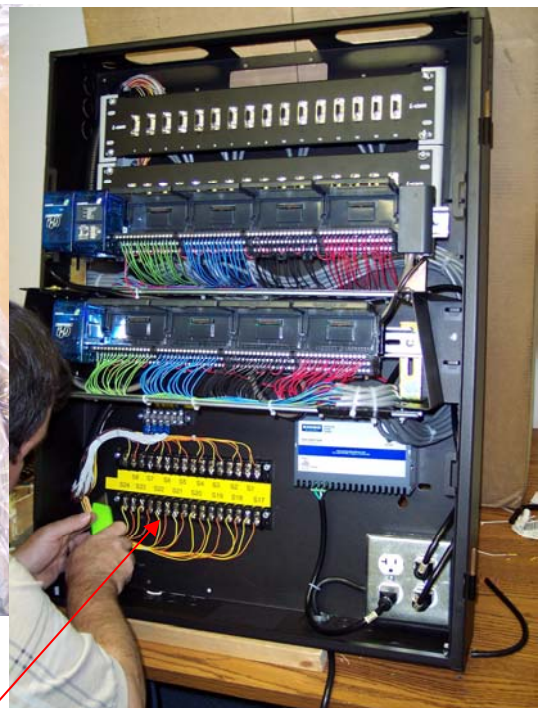

Teledon designed the conversion plans, and implemented them. The converted generator was delivered to the customer on a mobile platform. The design included a trailer mounted load bank for exercising the generator

The customer, Level 3 Communications, needed enclosure solutions for their satellite control systems. Teledon designed, built, and integrated their control systems into a standardized selection of wall mount solutions.

The customer was able to reclaim valuable rack space by moving their controls from a rack mount to a wall mount setup.
