## We Construct Your Success Quickly®

### Certifications & Identity numbers

**SBA 8(a) Certified** ♦ GSA Contract: **GS35F0714R** ♦ CAGE: **3D7Y2** ♦ DUNS: **093078835** ♦ GA DOT **certified DBE**

### Company Overview

- Teledon Solutions is a certified 8(a) business performing in the Telecommunications, Systems Engineering, Information Technology, Electrical Systems, and Construction & Project Management arenas for government and commercial customers - with a certified, OSHA knowledgeable Safety Engineer on staff
- **An established** business under same ownership & management since January 1999
- **Smooth product & service delivery is achieved through our unique processes, our daily email progress reports, and our ability to anticipate & proactively address issues**

### Core Competencies

- ✓ Full turnkey Engineer, Furnish & Install services
- ✓ Sales, design, implementation, and support of VoIP & traditional telephone systems, Routers & Switches, and other Data equipment
- ✓ RF solutions - Drive Testing & Installation including Wi-Fi and cell phone solutions
- ✓ Fiber-Optic cabling, inside & outside plant
- ✓ Installation, test & support of Central Office digital switches, fiber-optic systems, & data equipment
- ✓ Voice/data center Iron work & infrastructure build
- ✓ Construction engineering & project management services through our professional engineers
- ✓ DC power system installation & support
- ✓ Electrical contracting & low voltage systems

### Experiences

#### **Government sector –**

##### **GEORGIA PERIMETER COLLEGE**

Installation of data cabling throughout campus

##### **FORT GORDON, GA**

Installation and testing of complete data and voice communications system

##### **OSHA REVIEW COMMISSION**

IT support contract

##### **MALMSTROM AFB**

Designed optical transport system & provided remote support

##### **KINGS BAY, USN**

Upgraded lighting system in a large building, including the PA system

#### **Commercial sector –**

##### **TDS TELECOM**

Installation & support of central office equipment

##### **VERIZON WIRELESS**

Construction/project management of office building expansion

##### **MOVIUS INTERACTIVE**

Network Engineering Services

##### **LEVEL 3 COMMUNICATIONS**

Design and fabricate custom data cabinets & provide integration services

##### **ZAYO BANDWIDTH**

Provide optical wavelength/bandwidth expansion services; optimize DWDM fiber networks as needed

### Key Team Members' Experiences

- **Franklin Agyeman-Yeboah, PE, CPC** – 18-years experience in civil engineering, construction, project management, and construction administration
- **Joshua Dobos** – 16-years of experience in telecom, RF systems, & cellular engineering
- **Gary Haynes** – 19-years of experience in Central Office EF&I work, specializing in power systems
- **James Kelley** – 26-years experience with IT/data network design and support
- **Robert McDowell** – 26-years experience in telecom engineering, and business management
- **April Keown** – 24-years experience in industrial hygiene and safety engineering
- **Gene Morgan** – 28-years of experience in electrical systems, structured cabling, and digital switching
- **Jennie Pantano** – 25-years of experience in business management and accounting
- **Lewis Reid** – 20-years of experience in hardware design, and business financial management

Our customers have cited our efficiency in the deployment & support of their telecom & IT networks, and our daily progress reports as strong values we bring to the table.

Teledon Quality Auditor verifying that our work meets quality requirements

Completed line up of frames, light guide trays, and AC lighting

Proper labeling, with optional "flag-tags"

Attention to detail, meticulous planning, and a thorough quality program assure a hassle free experience when working with Teledon Solutions –

[Satisfaction guaranteed.](#)

Reducing our customers' administrative burdens by making sure we thoroughly understand their expectations, and asking pertinent questions before we start work - resulting in minimal or no change orders.

**Converting a fixed diesel generator into a mobile platform**

Verizon Wireless needed a mobile solution for emergency power generation. This is one of the generators we helped to convert from a fixed to mobile platform.

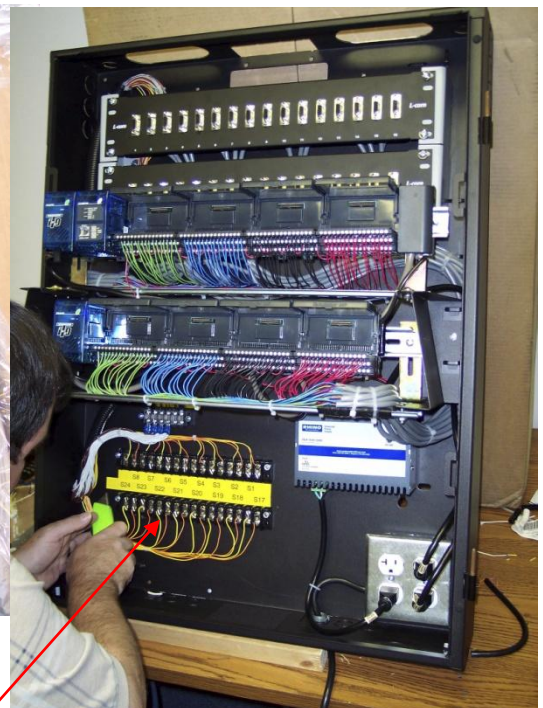

Teledon assisted in the design and implementation of the conversion plans. The converted generator was delivered to the customer on a mobile platform. The design included a trailer mounted load bank for exercising the generator

Our customer, Level 3 Communications, needed wall mount enclosure solutions for their satellite control systems. Teledon designed, built, and integrated their control systems into a standardized selection of wall mount solutions.

The customer was able to reclaim valuable rack space by moving their controls from a rack mount to a wall mount setup.
